

**Amendments to the Specification:**

Please replace the paragraph beginning on page 4, line 25, with the following amended paragraph:

In accordance with a seventh aspect, the invention provides a vehicle outside-image display apparatus as in the first aspect, further comprising: ~~a three-dimensional measuring unit adapted to perform, by a three-dimensional measuring instrument, a three-dimensional measurement for an environment in a picture range captured by the vehicle outside-image capturing unit;~~ a measurement value receiving unit adapted to receive a three-dimensional measurement value from outside; and a viewpoint converting unit adapted to convert the vehicle outside-image information to have a viewpoint from the camera based on the three-dimensional measurement value received by the measurement value receiving unit and to supply the converted information to the image combining unit.

Please replace the paragraph beginning on page 5, line 17, with the following amended paragraph:

In accordance with an eighth aspect, the invention provides a vehicle outside-image display apparatus as in the seventh aspect, further comprising a three-dimensional measuring unit adapted to perform, by a three-dimensional measuring instrument, a three-dimensional measurement for an environment in a picture range captured by the vehicle outside-image capturing unit; a measurement value combining unit adapted to combine the three-dimensional measurement value received by the measurement value receiving unit with the three-dimensional measurement value acquired by the three-dimensional measuring unit.
